Textbook:
Essential Mathematics for Economic Analysis, 3

rd edition, by Knut Sydsater, and
Peter Hammond is technically "required". Economics 1088 (Math Tools II) uses
the same textbook. This is a very good reference book, which you may use in the
future to refresh your knowledge of algebra and calculus. I will highly
recommend that you have this yWbKp/p/BldupdWonlbut I will not assign
problems to be turned in. The practice problems that I will suggest come from the
3rd edition.

Calculator ote:

As this is a course designed to teach mathematical techniques you will need a calculator that can do basic mathematical functions

Exams

We will take a total of three exams in this course. The midterm exams will be held on Thursday September 24th and Thursday November 5th. These exams will be held during the normal class time. If you miss a midterm exam, the weight of that exam will carry over onto the final. The final exam will be held on Wednesday December 16th from 1:30 to 4:00 p.m. in our normal classroom RAMY N1B23. The final exam will be cumulative. If you have three final exams scheduled for this day, and this is the last of your exams, you can take the final on another day.
